

Worksheet IX – Tax Benefit Rule for Recoveries of Itemized Deductions

If you recovered amounts from more than one year, such as a federal income tax refund from 2005 and a casualty loss reimbursement from 2004, complete a separate worksheet for each year. Use the information from Form 2, Itemized Deductions, for the year the expense was deducted.

For example: You claimed a casualty loss as an itemized deduction on your 2005 Montana income tax return. In 2009 your insurance company reimbursed you for the casualty loss. In order for you to determine if any of this reimbursement is taxable in 2009, you will need to use your 2005 Montana income tax return and Table 4 “Standard Deduction” on page 2 of this worksheet.

A recovery is included in income only to the extent the deduction reduced your Montana tax liability in the year deducted.
