

## Worksheet IX – Tax Benefit Rule for Recoveries of Itemized Deductions

If you recovered amounts from more than one year, such as a federal income tax refund from 2007 and a casualty loss reimbursement from 2006, complete a separate worksheet for each year. Use the information from Form 2, Itemized Deductions, for the year the expense was deducted.

Example: You claimed a casualty loss as an itemized deduction on your 2007 Montana income tax return. In 2011 your insurance company reimbursed you for the casualty loss. In order for you to determine if any of this reimbursement is taxable in 2011, you will need to use your 2007 Montana income tax return and Table 4 “Standard Deduction” on page 2 of this worksheet.

A recovery is included in income only to the extent the deduction reduced your Montana tax liability in the year deducted.

	Column A (for single, joint, separate, or head of household)	Column B (for spouse when filing separately using filing status 3a)
1. Enter the total of your federal income tax refunds received in 2011 for which a deduction was taken in a prior year. Do not include refundable federal credits or more than the amount of federal income tax deducted on Schedule III. ....1.		1.
