

## Worksheet IX – Tax Benefit Rule for Recoveries of Itemized Deductions

If in the current tax year you recovered amounts from more than one year, such as a federal income tax refund from 2012 and a casualty loss reimbursement from 2013, complete a separate worksheet for each year. Use the information from Form 2 or 2M, Itemized Deductions, for the year the expense was deducted.

Example: You claimed a casualty loss as an itemized deduction on your 2012 Montana income tax return. In 2015 your insurance company reimbursed you for the casualty loss. In order for you to determine if any of this reimbursement is taxable in 2015, you will need to use your 2012 Montana income tax return and the 2012 standard deduction on page 2 of this worksheet.

Include a recovery in income only to the extent the deduction reduced your Montana tax liability in the year deducted.

	Column A (for single, joint, separate, or head of household)	Column B (for spouse when filing separately using filing status 3a)
1. Enter the total of your federal income tax refunds received in 2015 for which you took a deduction in a prior year. Do not include refundable federal credits or more than the amount of federal income tax deducted on Schedule III .....1.		1.
